

Tibero

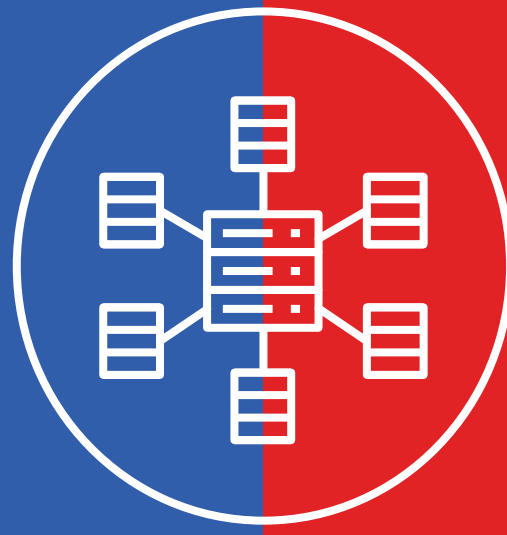

DataBase

ORACLE

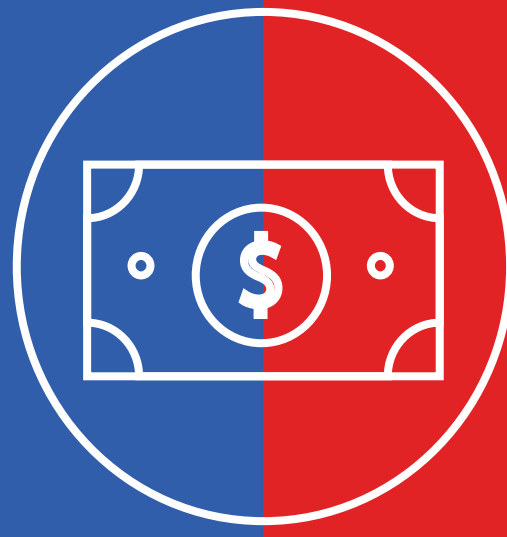

With Tibero, you pay for only the virtualized part of the HW you use.

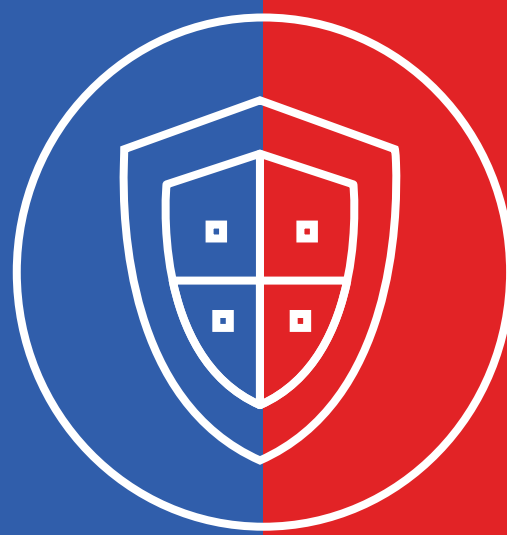

Oracle's soft partition model means you license 100% of the cores, regardless of what you use.

Tibero is proven to offer the lowest TCO based on licensing and support costs.

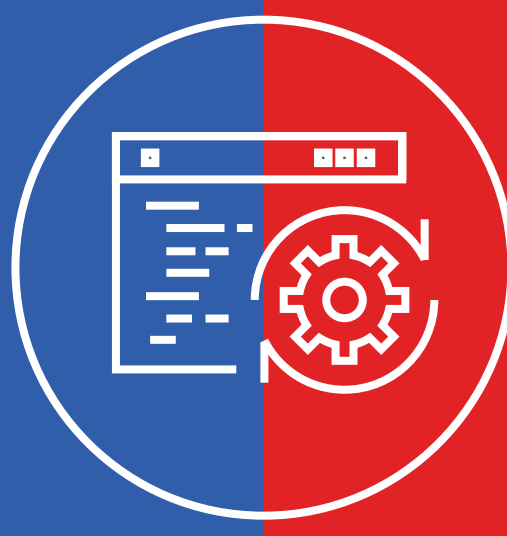

Oracle costs at least 50% MORE than Tibero for licensing and support.

It would take over 11 years to crack our digital signatures for just one dataset instance.

TmaxSoft engineers compromised Oracle's security in under 90 minutes.

Tibero is certified VMware ready and offers support on VMware.

Oracle isn't certified and doesn't offer support on VMware.
